An amazing array of colors

AREAS OF APPLICATION

POLY SHEEN® MULTI allows you to show your true colors: the range of colors for POLY SHEEN® MULTI is hard to beat. The colors harmonize perfectly with the color palette of the single-color POLY SHEEN® for both embroidery and decorative sewing. POLY SHEEN® MULTI is the

perfect thread for traditional embroidery and contemporary design. It can be used in every situation and is particularly well suited for use with highly stressed textiles such as sports and leisurewear, children's clothes, leather, work clothing, jeans and terry cloth.

PRODUCT FEATURES

■ High color fastness through innovative color technology

Gives embroidery and decorative application a brilliance of color. This means the colors appear even more expressive and dazzling.

■ Trilobal thread profile

Thanks to its trilobal qualities, POLY SHEEN® MULTI – unlike conventional embroidery and decorative threads – has a significantly larger surface to reflect the light, making it appear even more brilliant.

■ Ecology

POLY SHEEN® MULTI is manufactured according to current international ecological guidelines and certified according to STANDARD 100 by OEKO-TEX®.

■ High wash, boil and light fastness

The embroidery and decorative application also stay totally colorfast when subject to harsh treatments, such as chlorine bleach, wet/dry abrasion, washing and ironing.

■ High tensile strength

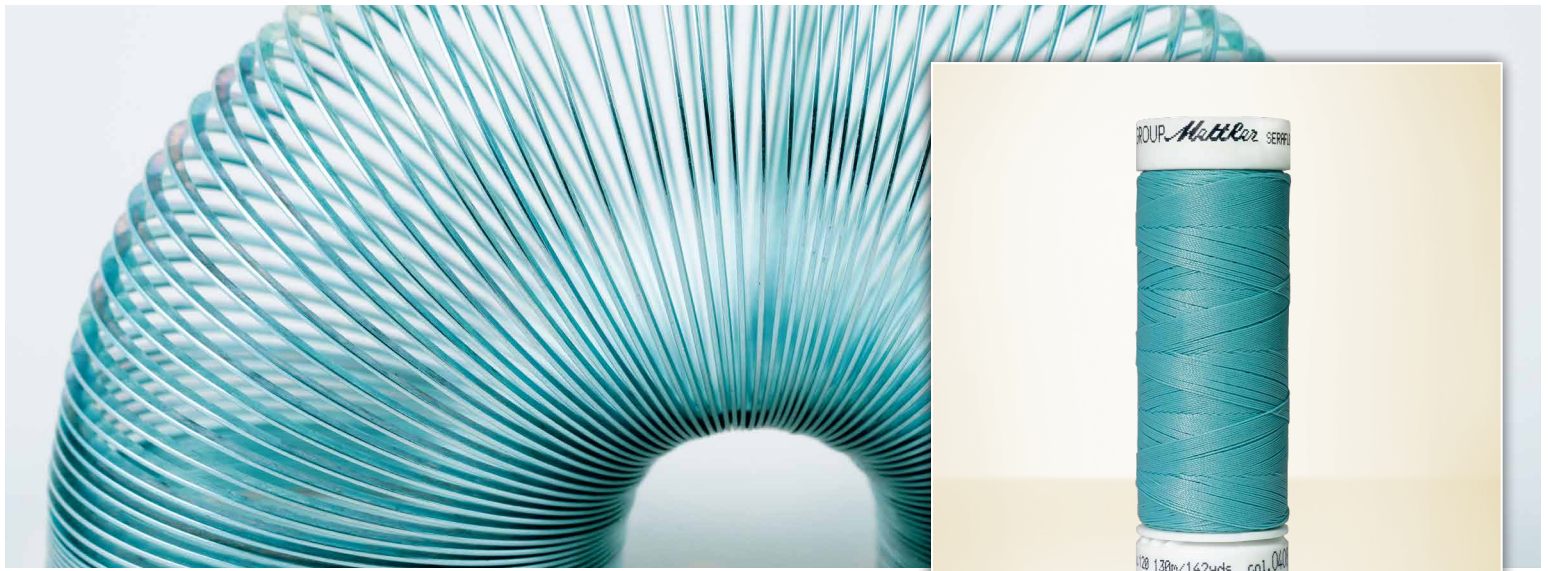

The tensile strength of the trilobal polyester yarn is 50% higher than rayon or viscose. Excellent embroidery and stitching guaranteed – with no risk of thread breakage. The thread can also be used with the latest high performance sewing and embroidery machines.

Article no.	Raw Material	Strength	Length	Number of colors	Linear density	Needle size Nm	Tensile strength cN	Elongation at break %	Care Instructions

Fantastic - elastic.

SERAFLEX
100% PTT (Polytrimethylenterephthalat)

AREAS OF APPLICATION

SERAFLEX is the perfect sewing thread for highly elastic seams. Due to its innovative raw material PTT (37% renewable raw material) an elongation of approx. 65% is achieved, making all seams highly elastic. SERAFLEX makes especially the straight stitch extremely stretchable, in the best case even a doubling of the seam elasticity can be achieved compared to seams with conventional sewing threads. Due to its extremely elastic properties SERAFLEX is primarily used for clothing, e.g. as sewing thread for sportswear, outdoor, women's, men's and children's clothing as well as for lingerie and underwear.

RECOMMENDATION OF APPLICATION

PRODUCT FEATURES

- The perfect sewing thread for all elastic fabrics
- Makes especially the straight stitch extremely stretchable (elongation of approx. 65%)
- Double seam elasticity can be achieved compared to seams with conventional sewing threads
- With SERAFLEX as lockstitch, ordinary chainstitch / serging stitch can be replaced!
- Large color selection of 36 fashionable colors

INSTRUCTIONS FOR USE

- SERAFLEX should be used both as a needle and as a bobbin thread
- Adjustment of the needle thread tension according to "as much as necessary, as little as possible" i.e. as loose as possible
- The bobbin thread should also be wound with as little thread tension as possible to prevent the thread from stretching beforehand

Article no.	Raw Material	Strength	Length	Number of colors	Linear density	Needle size Nm	Tensile strength cN	Elongation at break %	Care Instructions
